A root word tree graphic organizer provides a visual framework that maps out these relationships, allowing learners to see how different words are interconnected through their core roots.

What is a Root Word Tree Graphic Organizer?

A root word tree graphic organizer is a visual diagram resembling a tree, where the trunk represents the root word, and branches extend to show related words formed by adding prefixes and suffixes. This structure helps students grasp the concept that many words are built from a common base, and by understanding that base, they can decipher various related words.

Components of a Root Word Tree Graphic Organizer

Understanding the essential components of this organizer is crucial to using it effectively:

- **Root Word (Trunk):** The base word that provides the core meaning (e.g., *ject*, *scribe*, *port*).
- **Prefixes (Branches):** Morphemes added before the root to modify its meaning (e.g., *re-*, *un-*, *dis-*).
- **Suffixes (Branches):** Morphemes added after the root to change the word's form or function (e.g., *-ing*, *-ed*, *-able*).
- **Derived Words (Leaves):** The complete words formed by adding prefixes and/or suffixes to the root (e.g., *project*, *reject*, *discharge*).
