Sample Breakdown of Typical Chapter Questions and Their Answers

Chapter 1: The Economics of International Trade

Question: Explain the principle of comparative advantage and how it benefits trading countries.

Answer Overview:

- Comparative advantage occurs when a country can produce a good at a lower opportunity cost than another.
- Trade allows countries to specialize according to their comparative advantages.
- Benefits include increased overall efficiency and higher standards of living.
- Key Point: Even if one country is more efficient at producing all goods (absolute advantage), both can still benefit from trade through comparative advantage.

Approach Tips:

- Use a simple numerical example to illustrate opportunity costs.
- Draw a diagram showing production possibilities frontiers (PPFs).
- Emphasize the concept of mutually beneficial trade.

Chapter 4: Trade Policies and Welfare

Question: What are the welfare effects of imposing a tariff on imported goods?

Answer Overview:

- A tariff raises the domestic price of the imported good.
- Consumers face higher prices and reduced consumption.
- Domestic producers may benefit from increased sales.
- The government gains revenue from the tariff.
- Deadweight loss occurs due to reduced efficiency and lost gains from trade.

- Overall welfare may decline because the gains to producers and government are often offset by losses to consumers.

Approach Tips:

- Use supply and demand diagrams to show changes.
- Highlight the concept of consumer surplus, producer surplus, and deadweight loss.
- Discuss the political economy reasons for tariffs despite welfare losses.

Chapter 5: Exchange Rates and International Finance

Question: Describe how a country's balance of payments is affected by changes in the exchange rate.

Answer Overview:

- An appreciation of the domestic currency makes exports more expensive and imports cheaper.
- Exports tend to decrease, and imports tend to increase, leading to a worsening trade balance.
- Conversely, a depreciation makes exports more competitive and imports more expensive, improving the trade balance.
- The overall balance of payments adjusts through changes in the current account and capital flows.

Approach Tips:

- Diagram the supply and demand for foreign exchange.
- Explain the link between exchange rate movements and trade flows.
