Examples of Genetics Comparison Tables

To illustrate the power and utility of comparison tables, let's examine some classic comparisons in genetics.

Genes vs. Alleles

Attribute	Genes	Alleles
Definition	Segments of DNA that code for proteins or functional RNA	Variants of a gene that differ in sequence
Number	Typically one per locus; multiple copies can exist	Multiple alleles can exist for a single gene locus
Function	Determine inherited traits	Contribute to genetic diversity at a locus
Inheritance	Passed from parent to offspring	Segregate during meiosis; inherited as variants
