Philosophy and Approach to Art Restoration

Core Principles

Dollina's restoration philosophy centered around several core principles:

- **Respect for Originality:** Preservation of the artist's original intent and techniques was paramount. Restorations aimed to be reversible and discernible, ensuring that future conservators could differentiate between original and restored elements.
- **Minimal Intervention:** Only the necessary work was performed to stabilize and conserve the piece, avoiding overrestoration or unnecessary alterations that could compromise authenticity.
- **Scientific Rigor:** Restorations were based on thorough scientific analysis, including material testing, imaging techniques, and chemical assessments, to understand the original composition and deterioration processes.
- **Ethical Responsibility:** Dollina adhered to strict ethical standards, prioritizing the cultural and historical significance of each piece over aesthetic enhancements for superficial appeal.

Methodologies and Techniques

Dollina employed a combination of traditional craftsmanship and advanced scientific tools:

- **Non-Invasive Analysis:** Techniques such as X-ray fluorescence (XRF), infrared reflectography, and ultraviolet fluorescence allowed him to diagnose issues without damaging artworks.
- **Cleaning Procedures:** Carefully selected solvents and methods were used to remove dirt,

varnishes, and overpaints, tailored to each material.

- Structural Repairs: For sculptures and wooden panels, techniques included consolidating fragile substrates and reconstructing missing parts with compatible materials.

- Inpainting and Retouching: When necessary, retouching was done with reversible, stable paints that matched the original palette but clearly distinguished from authentic areas under UV or microscopy.
